OCARINA OF TIME · SWITCH 2

Every note on the ocarina, every way to play it

Five note buttons, each bent by the D-pad (half step) and the left stick (whole step). The two stack, so every button reaches three semitones either side of its natural pitch.

Pitch names follow the original game's layout: L = D, R = F, A = A, Y = B, X = D an octave up. Nintendo hasn't published the remake's sounding octave, so treat the octave numbers as written pitch.

Bends affect free play only. Songs are recognized from the five natural notes.
